# Destination Turkey:

## Workshop Series on “European and National Funding Opportunities for Brain Circulation, R&D Cooperation and Research Career

*FP7 Marie Curie Actions aim at strengthening quantitatively and qualitatively the human potential in research and technology in Europe. There are various types of mobility grants and upon them, Career Integration Grants and International Incoming Fellowships provide opportunities for the researchers of any nationality in the USA to conduct research in Europe. Furthermore, TÜBİTAK has recently announced a new programme for supporting the researchers' reintegration to Turkey.*

*The workshops, by gathering researchers from all nationalities, aim at creating awareness on all these programmes as well as opportunities of NSF on the advancement of international research relations and collaboration between the Research Groups in Europe and USA.*

*During the workshops the most successful public and private Turkish hosting organizations will be ready to present themselves and to inform the participants about their infrastructure, international collaborations, open positions and brain circulation policies.*

*With the attendance of the representatives from the hosting institutions in Turkey, the workshops will provide an ambiance where the researchers could contact with their future hosts. The road-show of the Turkish Hosting Institutions will open a new perspective for research career development.*

***You are kindly invited to contribute  
with your participation to this consequential initiative.***
